Senior GenAI Engineer with 15+ years of software engineering experience, currently building production-ready AI agents for large banking environments. Proven track record in designing agentic systems, MCP-enabled architectures, and RAG pipelines that integrate directly into developer and enterprise workflows.

Strong backend foundation (Java, Node.js, Python), fast prototyper, and hands-on builder who thrives in ambiguous, high-ownership environments. Experienced in shipping GenAI solutions used daily by engineers, with a pragmatic focus on impact, quality, and scalability.

WORK HISTORY

Senior GenAI / Full Stack Engineer

ING Nederland - Contract

11/2020 - Present | Amsterdam, Netherlands

- Designed and delivered production-grade AI agents for enterprise search, summarisation, and developer productivity.
- Built RAG pipelines using Elasticsearch and Gemini (Vertex AI) to improve knowledge retrieval accuracy and decision support.
- Developed MCP-enabled agentic systems enabling multi-API orchestration and scalable, production-ready AI workflows.
- Rapidly prototyped GenAI solutions and iterated them into production based on real user feedback.
- Integrated AI agents into existing engineering workflows, CI/CD pipelines, and internal platforms.
- Collaborated closely with engineers and product teams to improve agent quality, UX, and adoption.

Senior Technical Lead

HCL Technologies

11/2020 - Present | Amsterdam, Netherlands

- Led backend and platform engineering initiatives with a strong focus on AI-powered systems.
- Implemented Elasticsearch-based RAG integrations and AI governance controls.
- Guided teams on production readiness, observability, and secure AI deployment in regulated environments.

SKILLS

Back End

- AI Agents & Agentic Workflows
- MCP-enabled architectures
- Retrieval Augmented Generation (RAG)
- Prompt Engineering & Evaluation
- Google Gemini & Vertex AI & ADK
- Enterprise AI Governance & Guardrails

Back End

- Java 21 , Node JS, Python
- Express, REST, GraphQL
- Spring Core , Spring MVC
- Spring Boot , Spring Batch
- JPA , Elastic Search
- Struts , Hibernate, Kotlin

Front End

- Angular 2+, React JS , Vue JS
- Lit html, HTML5 , CSS3
- JavaScript , Bootstrap
- TypeScript, RxJS, Redux
- NestJS, Storybook

Senior Full Stack Engineer

UL

10/2019 - 11/2020 | Leiden, Netherlands

- Contributed to developing test tools for digital payments, ensuring safety and convenience for real-world applications.
- Developed platform applications using Angular 9 and Spring Boot 2.3 to enhance user experience and attract new customers.
- Migrated platform infrastructure from Windows servers to Docker containers, local storage to Azure cloud storage, and MySQL to MariaDB, reducing time to market by half and establishing a DevOps workflow.
- Implemented improvements in cryptography and transactions according to EMVCo 3DS specifications.
- Provided EMVCo 3DS technical advisory services to global customers, including MasterCard and VISA.

Senior Software Development Engineer

ABN AMRO Bank N.V.

07/2017 - 10/2019 | Amsterdam, Netherlands

- Responsible for building a team from ground zero and delivering value to customer without compromising on the quality.
- Gathering requirements from different stake holders and updating the same in JIRA.
- Active involvement and working experience in CI, CD (Jenkins, Sonar Fortify), Scrum and JIRA.
- Design, analysis and develop a hybrid application.
Responsible for design UML, revision of codes, output and documentation.
- Handling the change request, bug fixing and customer requirements and interacting with different stake holders.

Frontend Test

- Jest
- Cypress
- Selenium
- MochaJS
- Puppeteer
- Playwright
- Jasmine
- Karma

Backend Test

- JUnit
- TestNG
- Mockito
- Spring Test
- Postman
- RestAssured

DevOps

- AWS, Azure, Google Cloud
- Git , GitBucket, Azure devops, Gitlab
- Docker, Kubernetes, Docker Swarm
- Nexus IQ , Gradle , Fortify , Sonar
- Maven , Splunk , synthetics
- Ant , JIRA
- Podman, Prometheus

Technical Lead

USAA

06/2015 - 04/2017 | Hyderabad, India

- Responsible for leading the team that works in DevOps standards.
- Responsible for building a team from ground zero and delivering value to customer without compromising on the quality.
- Works on with JSP, Servlet, Hibernate, Struts, Spring, Selenium and JAX-RS and JAX-WS web service.
- Works on Spring Batch for processing batch applications.
- Works with hybrid applications using Cordova and Angular2.
- Implement best practices, define the rules and requirements for the technical and business process environment.

Senior Software Developer

USAA

07/2014 - 05/2015 | Hyderabad, India

- Responsible to maintain Agile SCRUM process.
- Responsible for documenting of functional designs and high level technical solutions including the guidelines for solution implementations.
- Responsible for design UML, revision of codes, output and documentation.
- Works on with JSP, Servlet, Hibernate, Struts, Spring and JPA.
- Leading development team.

Software Developer

TATA CONSULTANCY SERVICES

10/2011 - 06/2014 | Hyderabad, India

- Responsible for developing various applications for the web by using java programming languages and web services.
- Responsible for the development of software modules.
- Preparing technical designs, developing back - end business functionalities.
- Works on with JAX-RS and JAX-WS web service with Lucene Search for searching in file systems.
- Handled the tasks of designing and managing database by making use of Java tools.
- Execute system test cases and deliver the code for Functional Acceptance Testing.

Servers and Tools

- IBM WAS
- Apache Tomcat
- Oracle Web logic
- Eclipse
- IntelliJ IDEA
- Android Studio
- Xcode
- Oracle Web logic
- SQL Developer

EDUCATION

B.Tech(Electronics and Telecommunication)

Siksha 'O' Anusandhan University

06/2007 - 08/2011 | Bhubaneswar, India

HOBY

Gaming, wathing movies and series , Music and signing

ACHIEVEMENT

- Secure Coding Oscar for Best Secure Coding - 2019 , ABN-AMRO
